

# HAN VISION ON DIGITAL EDUCATIONAL RESOURCES

Attention for the public value of digital educational resources

## BACKGROUND

More control over creation, sharing, use and purchase (SURF, VH and UNL)

## AMBITION

All lecturers and participants (students and course participants) at HAN have easy access to a wide range of high-quality digital educational resources that are relevant to the educational context and professional practice, at a realistic and affordable price. These digital educational resources are developed by HAN or other institutions, companies or publishers. They are open/semi-open or commercial. Lecturers and participants can easily create and use their own mix of digital educational resources from the offerings. For the lecturer these will be resources appropriate to the meaningful learning experience they are trying to create and for the participant these will be resources appropriate to their personal learning needs at the time of use. HAN contributes to the local and national supply of digital educational resources by developing its own high-quality digital educational resources and sharing them whenever possible (semi-open/open).

## STATEMENTS

### EDUCATIONAL STRATEGY AND POLICY

HAN endorses the public value of open digital educational resources, encourages lecturers to use them in their teaching practice, supports participants in using them, and actively contributes to the guidelines.

### CULTURE AND HUMAN RESOURCE DEVELOPMENT

Everyone at HAN understands the value of digital educational resources. HAN provides space for professionalization, evaluates progress and recognizes and rewards.

### ORGANIZATION

HAN has an organizational infrastructure that supports and facilitates staff and participants in the use of digital educational resources. It also has a knowledge infrastructure for sharing knowledge.

### TECHNOLOGY AND INFRASTRUCTURE

HAN has digital facilities for the use of digital educational resources, allowing a mix of learning materials to be easily assembled and used from a central, easily accessible point.

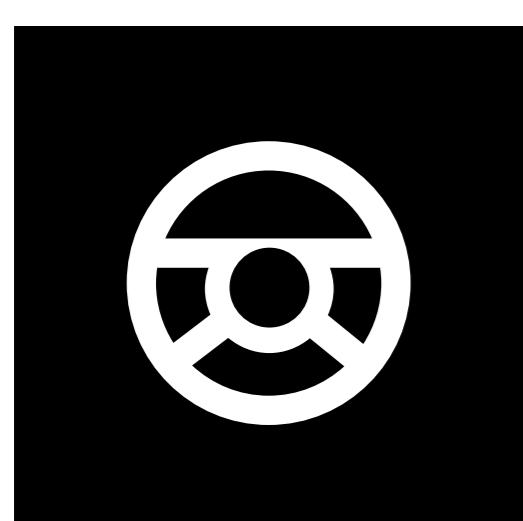

### ECONOMIC AND FINANCIAL

HAN encourages lecturers to use open educational resources as much as possible in their teaching and, where possible, covers the licensing costs (purchase under HAN conditions) and provides access for the entire study period.

### LAWS AND REGULATIONS

HAN has a clear and up-to-date publication policy and ensures a clear system of agreements with suppliers of digital educational resources regarding intellectual property rights, privacy, standards and data ownership.

## REALISATIE

### MANAGE

establishing and sharing policies and frameworks

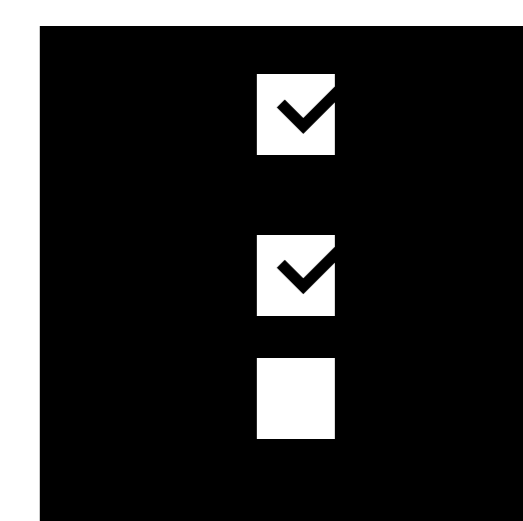

### STIMULATE

sharing, disseminating and valuing knowledge

### FACILITATE

money, time, resources and space

### EVALUATE

evaluating policy, vision, service and use in education
