Dear [aanhef],

Welcome to the Bachelor course in Chemistry! I hereby wish to offer you some starters information about the education program you have enrolled for. Because of the government measures against the coronavirus outbreak, the start of the academic year can be different than in other years. At the moment it is not completely clear yet how the classes will be organized. Probably we will offer a combination of “regular” and online classes. In August you will hear more about this.

In the flyer (attached) you will find practical information about the start of your Bachelor program. Please read carefully what applies to you.

It is possible that you are not yet officially admitted. This letter is not proof of enrolment. You can check your enrolment status at <https://hanuniversity.com/en/my-application/>.

In the last week of August, the introduction days take place, organised by our study association 't Reactievat. For more information, I refer you to the website of the introduction: <https://hanuniversity.com/en/events/intro-2021/programs/chemistry/>

The academic year will start on 30 August. We advise you to travel at least 2 weeks in advance to take into account a possible quarantine obligation. In the attached flyer you will find more information about the contents of the first days, for as far as we know now.

Do you have any questions? First, check the information in the flyer. If the answer is missing, you can contact the study career coaches (see contact details in the flyer).

I look forward to meeting you and I wish you a rewarding and successful Bachelor program.

Kind regards,

Harmen Neidig  
Director ATBC
